DeliverEats Agile Home

DeliverEats Agile Home

DeliverEats is a food delivery app connecting customers, restaurants and delivery partners. This space holds the product documentation for the agile version of the project, linked to the Jira space DeliverEats Agile (key DE).

This is a simulated Business Analyst portfolio project. The sprints are planned, not executed: no software was built and no real velocity was measured.

Project at a glance

Item	Detail
Epics	5 (DE-6 to DE-10)
User stories	19 (DE-11 to DE-29)
Story points	76
Sprints	6 planned two-week sprints
Scope	MVP (Android, one city, online payment only)

Pages in this space

- Product Overview: goal, MVP scope and epics
- Sprint Plan: six sprints with goals, dates and stories
- Definition of Ready and Done: criteria and how the NFRs apply
- Decision Log: key project decisions and reasons
