🎯 Product Overview

Product Overview

DeliverEats is a food delivery app connecting customers, restaurants and delivery partners. This is a simulated Business Analyst portfolio project (MVP scope). The agile work is planned, not executed: no software was built and no real velocity was measured.

MVP scope

Included: registration with OTP and login, restaurant browsing and menus, cart and order placement, online payment (Google Pay, Paytm) with automatic reversal on rejection or timeout, restaurant order management, delivery partner assignment and status updates, order status milestones, and in-app messages for payment failure and rejection.

Not in the MVP (future enhancements FE-01 to FE-06): live GPS tracking, push notifications, admin dashboard, complaints and manual refunds, ratings, Cash on Delivery.

Epics

5 Issues

Epic	Business requirements	Stories
DE-6 Account & Access	BR-01	DE-11, DE-12, DE-13
DE-7 Ordering	BR-02, BR-03	DE-14, DE-15, DE-16
