🔍 Decision Log

Decision Log

Key decisions for the agile version of DeliverEats. This is a simulated portfolio project.

ID	Decision	Reason	Status
D-01	Create the agile version by re-slicing the waterfall BRD and FRD, not by writing new requirements	Keeps both versions consistent and traceable	Accepted
D-02	Use 5 epics instead of 7 (one per BR)	The scope is small (8 BRs, 16 use cases). Seven epics would hold only 2 to 3 stories each. Epics should span more than one sprint.	Accepted
D-03	Cash on Delivery is excluded from the MVP and has no story	RULE-08 and FE-06: COD conflicts with RULE-02 (payment must succeed before the restaurant sees the order). Deferred, not rejected.	Accepted
D-04	DE-28 (payment-failed message) is	The failure flow (DE-18) is incomplete	Accepted

	scheduled in Sprint 3 although it belongs to the messages epic	without its message. Sprints are planned by deliverable value, not by epic.	
D-05	The user story sentence is written at the top of the Description field; the Summary is a short title	Common Jira practice; Summary has a 255-character limit	Accepted
D-06	NFRs are in the Definition of Done, not separate stories or an epic	Keeps stories focused on user outcomes	Accepted
D-07	Sprints and statuses are simulated	No application is built; velocity and burndown must not be read as real	Accepted
D-08	Future enhancements FE-01 to FE-06 are not created in Jira	They are documented in BRD v1.1 section 5.2 and excluded from the MVP	Accepted
D-09	Evidence is kept as screenshots, a CSV export and dashboard PDFs	Jira has no single export that preserves the project's appearance	Accepted
D-10	Four Confluence pages (Product Overview, Sprint	Shows documentation connected to the	Accepted

	Plan, Definition of Ready and Done, Decision Log) are linked to the Jira epics and stories	backlog; the PDF exports are kept in the GitHub agile folder because Confluence is private
